

## Special Issue

# Innovative Polymeric Nanocarriers and Their Drug Delivery Applications

### Message from the Guest Editor

This Special Issue aims to summarize the achievements and highlight the current developments in advanced drug delivery systems based on polymeric nanocarriers. Introduced in the 90s, polymeric nanocarriers have received growing attention during the last ten years with almost ten-fold increase in the number of publications. Compared to surfactant micelles, block copolymer micelles offer multiple advantages, including narrow size distribution and significantly lower critical aggregation concentrations, leading to higher stability and better retention of the drug. Such micelles can be used as both drug and gene delivery systems and offer infinite functionalization capabilities in terms of targeting specific tissues and cells, improving cell uptake and penetration across blood-brain barrier, achieving triggered release, etc. Many other interesting types of polymeric nanocarriers have been demonstrated recently, including DNA origami, polymer-coated nanoparticles, nanogel particles, and electrospan nanomaterials, to name a few. We welcome your contributions on all aspects of polymeric nanocarriers in this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Patrick J. Sinko  
Department of Pharmaceutics, Ernest Mario School of Pharmacy,  
Rutgers University, Piscataway, NJ 08854, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1  
(Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
