

## Special Issue

# Population Pharmacokinetics in Oncology and Its Clinical Applications

### Message from the Guest Editors

We are pleased to invite you to contribute to a Special issue of the peer-reviewed, open-access journal *Pharmaceutics*, which will be devoted to "Population Pharmacokinetics in Oncology and Its Clinical Applications". This Special Issue aims to encourage scientists and clinicians to publish their observations, experimental results, and theoretical assumptions to capture the current state-of-the-art advances in the PK–PD characterization of anticancer agents, encompassing traditional chemotherapies, recent protein kinase inhibitors, and monoclonal antibodies. Our goal is to encourage translational efforts in bringing this knowledge closer to medical applications, such as therapeutic drug monitoring and further treatment individualization approaches. We believe that these efforts represent an important component of the widely advocated precision oncology, alongside the approaches capitalizing on tumor genetics. We look forward to receiving your contributions.
