

## Special Issue

# 3D Printing Technology for Pharmaceutical and Biomedical Application

### Message from the Guest Editor

This Special Issue invites research on various medicines and instruments related to 3D printers. For example, medicines in various dosage forms based on a unique concept created with a 3D printer, medicines for elderly and pediatric patients who do not meet their needs, special devices for administering drugs, functional materials suitable for modeling with various 3D printers, special 3D printer parts suitable for manufacturing special pharmaceutical products, quality control research necessary for manufacturing 3D printers in future pharmaceutical factories and medical institutions, and fusion of advanced technologies (such as information technology and 3D printers) are applicable. Original research articles and reviews are welcome. I look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
