

## Special Issue

# Skin Drug Delivery: Local and Systemic Applications

### Message from the Guest Editors

Drug delivery through the skin is a challenge, due to its very effective barrier function. Application of drugs onto the skin is of great interest and may aim to achieve local or systemic effects. Although some drugs can effectively diffuse through intact skin, most of them are unable. Several approaches and drug delivery systems have been used to overcome these permeability issues, including, chemical or physical enhancement, use of nano or microparticles or the use of microneedles. On the contrary, a lower number of drugs used to treat topical conditions diffuse very effectively through the skin. Here, there is a need to retain the drug onto the skin surface to control drug access to systemic circulation through different strategies, such as the use of controlled release systems or targeting the hair follicle as a drug reservoir through nano-/micromaterials. This Special Issue has the aim of highlighting current progress in modulating skin permeability of drugs for topical and systemic applications. Contributions may be either original research or a review.

## About the Journal

### Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
