

Special Issue

Drug Delivery by Soft Matter

Message from the Guest Editor

Soft matter systems encompass a wide range of materials, such as polymers, colloids, emulsions, organogels, micelles, liposomes, etc. They make it possible to overcome difficulties in the formulation and delivery of poorly water-soluble drug molecules such as solubility and bioavailability issues; they can settle some biological stability issues of protein- and peptide-based drugs; they can aid the design parenteral controlled release forms; and can provide functionalized soft matter nanocarriers that are very effective in drug targeting.

The aim of this Special Issue is to discuss the current progress in the use of soft matter systems for the encapsulation and delivery of therapeutic molecules. We welcome articles dealing with the design and development of drug carriers utilizing soft matter principles, and their structure–properties–performance relations in drug delivery applications. All researchers working in these areas are cordially invited to publish their original research papers and review articles showcasing their expert opinions.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
