Stimuli-Responsive Therapeutic Formulations for Drug Release

Message from the Guest Editor

Stimuli-responsive formulations bring the possibility to trigger the release of therapeutic agents at the disease site, providing efficacious drug levels therein. This idea was thermosensitive liposomes. Since then, stimuli-responsive formulations have been an active field with a vast body of research comprising materials to design these systems as well as different strategies to exploit the outer and inner disease environment as triggering stimuli. Reported extracorporeal physical triggering stimuli include thermal, magnetic, ultrasound, light, chemical, and electric triggers. Formulations can also be sensitive on the tissue level, with endogenous signals such as acidic pH, redox potential (glutathione, GSH), enzymes, hypoxia, or infection, having been explored as trigger stimuli. So far, the main application of these systems has focused on the treatment of tumors and infections. This Special Issue will highlight current advances and challenges in the broad theme of stimuli-responsive formulations. We encourage the submission of focused review manuscripts as well as original research concerning in vitro, in vivo, and translational studies.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko
Department of Pharmaceutics, Ernest Mario School of Pharmacy,
Rutgers University, Piscataway, NJ 08854, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1
(Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
