

Special Issue

Continuous Twin Screw Granulation

Message from the Guest Editors

Today, granulation is frequently applied to improve the flowability, homogeneity and/or compressibility of formulations prior to tableting or capsule filling. A wide variety of granulation techniques is available for this purpose. Driven by the advantages offered by continuous manufacturing, there is an increasing interest in continuous twin-screw granulation. As the residence time during continuous twin-screw granulation is of a different time-order than during batch-wise wet granulation, different formulation strategies are needed. Furthermore, integrating the unit operation of twin-screw granulation into a fully continuous tableting line requires advanced process control, the implementation of PAT and an understanding of the interaction between upstream and downstream unit operations. This Special Issue aims to bring state-of-the-art research-related continuous twin-screw granulation to the attention of a wide audience. We would be delighted to receive submissions of articles related to formulation and/or process development, PAT implementation and the modeling of twin-screw granulation.

About the Journal

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceuticals and biopharmaceuticals. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
