# Nanocarrier-Hydrogel Hybrids in Wounds Healing

# Message from the Guest Editors

In recent years, there has been significant development of nanomedicine and nanotechnology in the treatment of wound infections. Nanostructured (as well as hydrogel matrix) systems are effective media for the active and medicinal substances used to treat bacterial infections and to stimulate wound healing.

The combination of nanocarrier and hydrogel matrix offers many benefits as a transdermal formulation, such as controlled drug delivery and easy administration, thus enhancing patient compliance. Moreover, this solution provides improvement in rheological and sensory properties of the nanocarriers and facilitates its application to the skin. The addition of rheological modifiers allows one to prolong the contact time of preparation with the skin and to increase the skin hydration level by forming a hydrophilic film on the skin surface and reducing the transepidermal water loss. This is a very important aspect in skin regeneration. To summarize, the hybrid systems of the nanocarrier–hydrogel matrix seem to be an extremely interesting solution in wound treatment.

# **About the Journal**

# Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

#### Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Ernest Mario School of Pharmacy, Rutgers, The State University of New Jersey, William Levine Hall, Room 225C, 160 Frelinghuysen Road, Piscataway, NJ 08854-8020, USA

## **Author Benefits**

# **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

## Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)

# **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
