Special Issue

Exploring Herbal Medicine: Applying Epidemiology Principles

Message from the Guest Editor

Herbal medicine stands at the intersection of traditional practices and modern healthcare, offering potential therapeutic benefits. Delving into the epidemiological aspects of herb therapies is crucial in harnessing their efficacy and ensuring patient safety. This Special Issue will bridge the gap between herbal medicine and epidemiology, focusing on various herbal treatments and their interactions, outcomes, and safety profiles. We welcome original research articles and reviews that explore the epidemiological principles underlying herbal medicine. Potential themes for submissions include, but are not limited to, the following:

- Epidemiological studies on utilization and safety of specific herbal remedies;
- Investigations into the effectiveness of herbal interventions in population health;
- Evaluations of herbal drug interactions and their implications;
- Assessments of the public health impacts of herbal medicine use;
- Analyses of traditional knowledge and contemporary epidemiological practices in herbal medicine research.

About the Journal

Message from the Editor-in-Chief

We are very proud to launch this new, international, peer-reviewed, and open access journal. The main aim of *Pharmacoepidemiology* is to publish novel and up-to-date research findings, reviews, and communications on the beneficial effects of drugs as well as their potential adverse effects on humans through epidemiological studies conducted in the real world on large populations.

All researchers working in the pharmacoepidemiologic field—such as epidemiologists, clinical researchers, pharmacologists, clinicians, and biostatisticians—are welcome to contribute to *Pharmacoepidemiology*.

Editor-in-Chief

Dr. Carlotta Franchi

Laboratory of Pharmacoepidemiology and Human Nutrition,
Department of Health Policy, Istituto di Ricerche Farmacologiche Mario
Negri IRCCS, Milan, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 3.2 days (median values for papers published in this journal in the first half of 2025).
