Message from the Guest Editors

Dear Colleagues,

Overuse and misuse of antibiotics have resulted in rapidly increasing rates of resistance, making common infectious diseases more difficult to treat. The use of antimicrobial stewardship principles to slow the emergence and spread of resistant bacteria has been recognized globally as an important tool in optimizing antimicrobial usage. Through optimization of drug, dose, duration, and spectrum of activity, antimicrobial stewards can improve patient outcomes, reduce hospital-associated costs, and reduce the development of further bacterial resistance.

We invite you to share your approaches and successes in improving antimicrobial use in hospitalized patients. We welcome submissions of all types, including original research, brief reports of original research, reviews, or communications. Also the submission of resident or trainee research projects that focused on improving antimicrobial use in hospitalized patients.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance.

The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.6 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2023).
