Message from the Guest Editors

In pediatric pharmacotherapy, clinicians are often left to use case reports, case series, and retrospective reviews to determine the most efficacious and safe pharmacotherapy in pediatric patients. Despite federal legislation, the lag time for pediatric-specific labeling for drugs approved for use in adults is approximately eight years. This lag time necessitates the use of medications off-label. The intent of this Special Issue is to provide clinicians with data supporting or cautioning use of medications that may have limited data to optimize efficacious and safe pharmacotherapy in pediatrics.

We invite authors to share experiences with medications in pediatric patients with limited data related to efficacy and safety. This may include experience with new dosing regimens, monitoring parameters, and pharmacokinetic or pharmacogenomic considerations. Our hope is that this Issue can contribute to and advance pediatric pharmacotherapy.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance.

The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.9 days after submission; acceptance to publication is undertaken in 3.7 days (median values for papers published in this journal in the first half of 2024).
