PRN Medicines Management

Guest Editor:

Prof. Dr. Mojtaba Vaismoradi
Faculty of Nursing and Health Sciences, Nord University, 8049 Bodø, Norway

Deadline for manuscript submissions:
closed (31 August 2021)

Message from the Guest Editor

PRN stands for 'pro re nata' and is defined as authorising nurses to administer medications based on their discretion and by the patients' requests as unscheduled medication administration alone or in combination with routine/regular prescriptions.

In this Special Issue, the editor welcomes qualitative and quantitative research articles, commentaries, letters to the editor, theoretical and methodological reviews on healthcare professionals' experiences relating to PRN medicines management consisting of prescription, administration and monitoring adverse drug reactions in short-term and long-term healthcare settings and acute care and emergency departments. The suggestion of innovative and practical strategies for improving the safety of PRN medication practice is emphasised.
