Message from the Guest Editor

Medication safety plays an essential role in all healthcare organizations; focusing on improvement in this area is paramount to wider quality and safety programs. Many interventions to address medication errors have been described in the literature, including use of computer-assisted management, computerized physician prescribing systems, barcoding and robotics, as well as clinician training and education, system changes and guideline implementation. These interventions have had varied results in terms of improving patient safety and reducing adverse events in both the hospital and primary care setting.

We invite you to share your approaches and successes in addressing medication safety. We hope this Special Issue will inspire researchers to share their own practices, adopt new approaches and innovate to make improvements.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance.

The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.9 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the second half of 2025).
