Pharmacists' Roles in the Identification, Prevention and Treatment of Substance Use Disorders

Message from the Guest Editor

Substance misuse involves hazardous or addictive use of psychoactive substances, including alcohol, tobacco, illicit drugs (e.g., marijuana, cocaine, heroin), and prescription medications (e.g., opioids, gabapentinoids, benzodiazepines). The DSM-5 categorizes these as substance use disorders (addictions) and substance-induced disorders (intoxication/withdrawal). Substance abuse contributes to significant morbidity and mortality, worsening conditions like HIV, hepatitis, liver cirrhosis, and respiratory disease. It also affects workplaces through reduced productivity, absenteeism, and safety risks. Prescription drug misuse is widespread, and dependence can be difficult to identify and manage. Pharmacists play a key role in prevention, education, and treatment. Their expertise enables them to identify substance use disorders, counsel patients, and ensure safe medication distribution. They can improve treatment access and outcomes across community, secondary, and primary care settings. We invite submissions on pharmacists' approaches to addressing substance use disorders, including original research, reviews, brief reports, and trainee projects.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.9 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the second half of 2025).
