# Drug Repurposing: Strengthening Outcomes of Existing Pharmaceuticals to Shift Emerging Health Challenges

# Message from the Guest Editors

Drug repurposing is an innovative and increasingly successful approach to identify new therapeutic uses for approved or investigational drugs. This strategy is supported by the shared biological mechanisms underlying many diseases and the concept of pleiotropic drug action. Among its key advantages are a reduced risk of failure—owing to established safety and efficacy in preclinical models and humans-and a significant shortening of the overall development timeline. Drug repurposing plays a particularly important role during public health crises, where rapid access to effective treatments is critical. Moreover, the search for new indications often leads to the discovery of novel drug targets or signaling pathways, thereby advancing our understanding of disease biology. This Special Issue aims to highlight both the innovative and practical dimensions of drug repurposing while also exploring its intersections with drug regulation and pharmacological research. We welcome original research articles, as well as comprehensive reviews, that contribute to advancing this dynamic field.

# **About the Journal**

### Message from the Editorial Board

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access formatresearch articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general publichave unlimited and free access to the content as soon as it is published.

#### **Editors-in-Chief**

Prof. Dr. Jon Schommer

College of Pharmacy, University of Minnesota, Minneapolis, MN 55455, USA

Prof. Dr. David J. Wright

School of Healthcare, University of Leicester, Leicester LE1 7RH, UK

### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

#### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.9 days after submission; acceptance to publication is undertaken in 3 days (median values for papers published in this journal in the first half of 2025).
