Advances in Experiential Learning in Pharmacy

Message from the Guest Editor

The scope of pharmacy practice has evolved, with pharmacists assuming more patient-facing roles and playing a more direct role in medication management including, in some countries, prescribing. Pharmacy programmes are therefore expected to equip students with the necessary skills and knowledge, which are transferable to this changed and evolving practice environment. Experiential learning (EL) has emerged as an increasingly important and effective component in pharmacy education that allows students to apply the skills and knowledge gained in university to real-world settings. This Special Issue invites papers addressing new and/or different approaches to teaching, learning, and assessments in EL in the pharmacy curriculum. This can include attachments in the practice setting as well as simulated settings. It is hoped that this Special Issue will inspire educators and researchers to share the exciting approaches to EL, as well as serve as an impetus for pharmacy programmes worldwide to adopt new approaches or undertake changes to their own EL.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.9 days after submission; acceptance to publication is undertaken in 3 days (median values for papers published in this journal in the first half of 2025).
