

Special Issue

The Burden of Medicines

Message from the Guest Editor

This Special Issue focuses on the burden of medicines on patients' lives and the role of pharmacists in helping to reduce that burden. Drug therapy remains to be the most used intervention to prevent illness, reduce symptoms, and treat disease. Unfortunately, medicines are associated with numerous adverse effects that impact on the quality of life and wellbeing of patients. Non-pharmacological approaches to control disease are preferred over drug treatment, but unfortunately these are sometimes insufficient on their own. Patients on multiple drug therapy (polypharmacy) and those with comorbidities are at high risk of drug-related problems. However, pharmacists could help in reducing the burden of drug therapy through the application of pharmaceutical care (PC). With its patient-centred philosophy of practice, the full application of PC should help patients make the best out of their medicines. Given that patients' perspectives on issues related to the use of medicines are different from those of health care providers, more attention is now drawn toward assessing the burden of drug therapy from the perspective of the patient.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Editor-in-Chief

USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.9 days after submission; acceptance to publication is undertaken in 3 days (median values for papers published in this journal in the first half of 2025).
