Community Pharmacists and Optimization of Patient Medication Use

Message from the Guest Editors

Over the past decades, the role of community pharmacists has shifted from dispensing drugs to engaging in a pharmaceutical care approach centred on monitoring side effects, drug interactions, adherence and therapeutic objectives in collaboration with the patient, and other healthcare professionals. Community pharmacists can, therefore, play an increasingly key role in optimizing patient medication experience and use. They have frequent encounters with patients, can assess their experience and needs, and can suggest strategies to overcome difficulties related to patients' medication.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.
