

Special Issue

Compounding in Contemporary Pharmacy Practice

Message from the Guest Editor

As the role of pharmacists has changed from product-orientated to person-orientated, the place of compounding within pharmacy practice has diminished. There are some that say that compounding no longer has a place in pharmacy practice and others that compounding is an integral part of a pharmacist's knowledge. This issue will explore the role of compounding in modern pharmacy practice and ways that pharmacists can ensure the quality of the products that they make and have confidence that the product they made was the product they intended to make. You and your colleagues are invited to submit articles about any aspect of compounding with in contemporary pharmacy practice or pharmacy education.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Jon Schommer

College of Pharmacy, University of Minnesota, Minneapolis, MN 55455,
USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.9 days after submission; acceptance to publication is undertaken in 3 days (median values for papers published in this journal in the first half of 2025).
