Medication Use and Patient Safety in Clinical Pharmacy

Message from the Guest Editors

The use of medication is a crucial aspect of clinical pharmacy practice, as it is one of the primary ways in which pharmacists contribute to patient care. However, medication use is not without risks, and errors in prescribing, dispensing, and administration can have serious consequences for patient safety. In recent years, there has been a growing emphasis on improving medication safety in clinical pharmacy practice. This has led to the development of various strategies and tools that aim to minimise the risk of medication errors and adverse drug events. Preventing inappropriate medication use and associated adverse effects is important in the improvement of the health and well-being of patients, especially the elderly. This Special Issue will consider articles showing the latest research in medication use and patient safety in clinical pharmacy. We look forward to your contributions in the form of original research articles, short communication, reviews, case reports or study protocol.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.9 days after submission; acceptance to publication is undertaken in 3 days (median values for papers published in this journal in the first half of 2025).
