# Professional Ethics in Pharmacy: Exploring Contemporary Challenges and Future Directions

### Message from the Guest Editor

Pharmacists today are practising in a vastly different ecosystem to traditional models of practice and accepted norms of practice. Fast-tracked technological and healthcare advancements are emerging around the world with immense impact on healthcare delivery, including pharmacy, in the context of patient-centred care. No doubt the pandemic has also had impact on new emerging roles in pharmacy in many countries, such as vaccinating and rescheduling of many prescription medicines to “pharmacist-only” supply. With pharmacists’ roles expanding, increased utility of artificial intelligence, and professional responsibilities are evolving. Ethical norms of practice are also expanding to encompass change and broader scope of practice. There is intense pressure on the profession to rise to the occasion to serve with integrity and enhance trust of the public. Ethical sensitivity and awareness of expectations of the public are therefore ever more important to the profession. I invite you to share your research on contemporary professional ethics in practice to this Special Edition.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.
