

## Special Issue

# Optimising Medicines in Care Homes

### Message from the Guest Editors

The scope of this Special Edition is to share learning on how Pharmacy teams are improving medicines optimisation in care homes. A number of reports (e.g. CHUMS) have highlighted the suboptimal prescribing, dispensing and administration of medicines in care homes. With so much going on in this field, now is the time start sharing innovative and best practice. We encourage teams working in care home settings to present your research, reviews and quality improvement work. We are particularly interested in work related to quality improvement methods to develop clinical services, outcomes data, integrated working, shared decision making with residents, the role of the multidisciplinary team, skill mix (including the role of the pharmacy technician) and deprescribing. We hope that your work will help support clinical teams to develop their services.

### Guest Editors

Dr. Wasim Baqir  
NHS England, UK

Dr. Graham Stretch

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.
