Country Profiles of the PHARMINE Survey of European Higher Educational Institutions Delivering Pharmacy Education and Training

Message from the Guest Editor

The PHARMINE (Pharmacy Education in Europe) European consortium surveyed pharmacy education and practices in 2012. Surveys were updated in 2017 for publication. The PHARMINE consortium was especially interested in specialization in pharmacy education and practice (for communities, hospitals and industrial pharmacies), and in the impact of the Bologna agreement, and of the directive of the European Commission, on education and on training for the sectoral profession of pharmacy, in European degree courses. The surveys underline the varying attitudes of the different European countries to these various aspects. The surveys will now be published in *Pharmacy*. They will be useful to researchers in education, and to staff and students interested in mobility amongst different European and/or non-European countries.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.
