

## Special Issue

# Pharmacist–Physician Collaborative Research

### Message from the Guest Editor

The role of the pharmacist continues to grow and move towards a greater involvement in direct patient care. In many cases, that involvement is as part of a collaborative care team. Pharmacist–physician collaborations have been shown to improve patient outcomes, increase access to care, increase efficiency, and patient satisfaction. Despite these benefits, challenges to successful collaborations exist and they still represent an exception to rather than the usual care. We invite you to share your approaches and successes in developing and implementing innovative pharmacist–physician collaborations. We also welcome research describing the challenges and barriers to wider adoption of successful collaborations. We hope this Special Issue will inspire other pharmacists and researchers to develop new innovative collaborations, and adopt new approaches.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.
