Special Issue

Reflective Practice beyond Pharmacy Education: A Move towards Interprofessional Reflective Practice

Message from the Guest Editors

Reflective practice has been at the forefront of the literature since the 1900s. Originally utilized by professionals in healthcare education within their silos, the literature posits that engaging in reflective activities may enhance future practice by drawing on one's previous experiences, viewing different perspectives, and challenging one's own firmly held beliefs and assumptions in order to make better informed decisions and judgements.
