Travel Medicine - Series ☒

Message from the Guest Editor

Travel medicine is a relatively new discipline and the founding of the International Society of Travel Medicine (www.istm.org) occurred in the early 1990s. Pharmacists have, in recent years, become increasingly involved in delivering travel medicine services in the community sector. This has evolved in a number of countries where community pharmacists are now providing a travel vaccination service and are running travel clinics to prepare travellers prior to departure. Pharmacists have also become involved in other aspects of travel medicine, such as providing specialist medical kits for travel and expeditions, and in the management of a variety of infectious diseases encountered by travellers. The principle aim of this Special Issue is to share good practices amongst pharmacists providing travel medicine services. We hope that this will encourage further involvement of the profession in this growing speciality

About the Journal

Message from the Editorial Board

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.
