An Exploration of the Confluence between Pharmacogenomics and the Medication Experience

Message from the Guest Editors

Both pharmacogenomics (PGx) and the medication experience (MedXp) seek to understand how persons respond to medications to inform therapeutic choices that are best suited to the individual. While PGx utilizes an individual's genetic makeup to guide medication dose and selection, the MedXp accounts for the individual's subjective experience of taking a medication in their daily life. Neither approach will achieve their common goal without consideration of the other, and thus the sooner they cross paths, the better. This Special Issue, titled *An Exploration of the Confluence between Pharmacogenomics and the Medication Experience*, aims to highlight connectivity between these two fields and accelerate their joint incorporation in pharmacist practice. We invite the submission of manuscripts on this topic to this Special Issue in *Pharmacy*, an open access, scholarly journal of pharmacy education and practice. There are opportunities for a discounted article processing fee, the applications for which will be reviewed on a case-by-case basis.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.9 days after submission; acceptance to publication is undertaken in 3 days (median values for papers published in this journal in the first half of 2025).
