History of Medicine, an Essential and Evergreen Tool for Health Scientists

Message from the Guest Editor

Health sciences are the most rapidly-growing fields among all scientific domains, but while technical education and progression are accelerating, the human impact often stays behind. However, a number of recent papers have stressed a plethora of skills and abilities in which it is currently important to focus on going far beyond technical acquisition. Most authors refer to the importance of in-depth knowledge of the so-called “philosophical aspects” of medical art from Bachelor to Ph.D. courses. The aim of this Special Issue is to give an overview of the different branches that relate to the history of medicine that are relevant for biomedical education, including ethics, biomedical museology, medical education, and paleopathology. Although the issue is focused on theoretical considerations about historical aspects of biomedicine, other contributions are welcome. All scholars interested in this theme are invited to submit their contribution, independently from the Editor’s invitation.

Guest Editor

Prof. Dr. Luigi Santacroce

Interdisciplinary Department of Medicine, Section of Microbiology and Virology, School of Medicine, University of Bari “Aldo Moro”, 70124 Bari, Italy

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Jon Schommer

College of Pharmacy, University of Minnesota, Minneapolis, MN 55455,
USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.9 days after submission; acceptance to publication is undertaken in 3 days (median values for papers published in this journal in the first half of 2025).
