Message from the Guest Editors

This Special Issue of *Philosophies* is devoted to dialogue between feminist care ethics and mainstream philosophical figures and concepts. As care ethics has evolved from its origins in the 1980s, it is clear that it does not always fit neatly within traditional philosophical categories. Yet, the philosophical implications of the ethics of care are robust and extend beyond ethics as such, with care theorists positing ontological, epistemological, and political significance to its approach. Despite these implications, and the growing acceptance of care ethics in a variety of academic literatures, it remains a somewhat marginalized philosophical framework. The original contributions to this volume juxtapose care theory with established philosophers and philosophical thought. The goal is to catalyze further intellectual interest and attention in how care enriches philosophy across a variety of subjects.

Message from the Editor-in-Chief

Philosophies searches for the syntheses of philosophical and scientific inquiries. It promotes philosophical work that is derived from the experience of diverse scientific disciplines and cultures. Multiple philosophies already exist — those of logic, information, computation, natural and artificial life, natural or artificial intelligence, complexity, technology, etc. Our mission is not to abandon philosophical roots and traditions of inquiry, but to promote the development of philosophical foundations and effective methodologies derived from diverse scientific explorations, and intended to enhance these explorations as to generate deeper and more holistic knowledge. Innovation may also be achieved through the cultural dimension. Other cultures can offer from their heritage a diversity of resources for exploration; these resources can also contribute to the emergent synthesis of philosophical inquiry.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PhilPapers, and many other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 20.4 days after submission; acceptance to publication is undertaken in 6.2 days (median values for papers published in this journal in the first half of 2021).
