Message from the Guest Editors

Dear Colleagues,

The recent pandemic is not only a social and economic but also an ethical challenge. Saving lives and the respect for human dignity are claims which seem to compete or even clash with the rights of freedom and equality. Should selected groups of patients be offered privileged access to scarce medical goods and healthcare? Are there any pro-arguments and criteria available recommending such a selection? Should vaccination be obligatory for professionals in medicine, in schools, and in the public sphere in general or would such an obligation be intolerably paternalistic and a violation of the law of privacy? Facing some of these problems, former ethical problems, e.g., organ donation, three-parent babies, surrogate parenting, and human embryonic stem-cell research seem to be marginalized, yet so far, none of these problems have been solved, and none of them is more urgent than the other. We kindly invite you to contribute to an issue of this journal. You are free to choose one of the problems mentioned or any other you prefer.

Message from the Editor-in-Chief

Philosophies searches for the syntheses of philosophical and scientific inquiries. It promotes philosophical work that is derived from the experience of diverse scientific disciplines and cultures. Multiple philosophies already exist — those of logic, information, computation, natural and artificial life, natural or artificial intelligence, complexity, technology, etc. Our mission is not to abandon philosophical roots and traditions of inquiry, but to promote the development of philosophical foundations and effective methodologies derived from diverse scientific explorations, and intended to enhance these explorations as to generate deeper and more holistic knowledge. Innovation may also be achieved through the cultural dimension. Other cultures can offer from their heritage a diversity of resources for exploration; these resources can also contribute to the emergent synthesis of philosophical inquiry.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PhilPapers, and other databases.

Journal Rank: CiteScore - Q1 (*Philosophy*)
