Message from the Guest Editor

Can we explain human reasoning in terms that are consistent with our theories of space, time, and matter? Assuming we are physical beings, it would seem that this is a necessity, but it is unclear whether the two worldviews can be reconciled given the differences in their underlying logic. If they cannot, does this entail that we are not part of the natural world? Is it, therefore, possible to construct a picture of reality that includes ourselves and our perspective on that reality?

The aim of this issue is to explore the questions that arise from the attempt to construct a scientific picture of reality, humans included. The goal is to look at these issues from a variety of contemporary perspectives, including natural science, social science, linguistics, cognitive science, and philosophy.

In this Special Issue, original research articles and reviews are welcome.

Message from the Editor-in-Chief

Philosophies searches for the syntheses of philosophical and scientific inquiries. It promotes philosophical work that is derived from the experience of diverse scientific disciplines and cultures. Multiple philosophies already exist — those of logic, information, computation, natural and artificial life, natural or artificial intelligence, complexity, technology, etc. Our mission is not to abandon philosophical roots and traditions of inquiry, but to promote the development of philosophical foundations and effective methodologies derived from diverse scientific explorations, and intended to enhance these explorations as to generate deeper and more holistic knowledge. Innovation may also be achieved through the cultural dimension. Other cultures can offer from their heritage a diversity of resources for exploration; these resources can also contribute to the emergent synthesis of philosophical inquiry.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PhilPapers, and many other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 20.4 days after submission; acceptance to publication is undertaken in 6.2 days (median values for papers published in this journal in the first half of 2021).
