submissions:

**closed (25 July 2022)**

### Message from the Guest Editor

The COVID-19 pandemic has brought our attention back to the **management and equitable distribution of limited health resources**. Initially, the debate focused on intensive care beds and the availability of respirators. Later, the focus shifted to access to vaccines.

The intent of this issue is not so much to reflect on what happened during the pandemic, but **to look to the future: What can we learn from the pandemic**. Are we better prepared to face other similar challenges in the future? Have we found values or principles that could guide us in equally difficult choices in the future? Would the ethical principles that have guided us in this pandemic work in the future?

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Allocation of health resources and theories of justice;
- Criteria for allocation of life-saving resources;
- Conflicts to secure limited resources and their management;
- Rationing of health resources in emergency conditions;
- Decision making under scarcity;
- Inequalities in health and well-being;

I look forward to receiving your contributions.

## Message from the Editor-in-Chief

*Philosophies* searches for the syntheses of philosophical and scientific inquiries. It promotes philosophical work that is derived from the experience of diverse scientific disciplines and cultures. Multiple philosophies already exist – those of logic, information, computation, natural and artificial life, natural or artificial intelligence, complexity, technology, etc. Our mission is not to abandon philosophical roots and traditions of inquiry, but to promote the development of philosophical foundations and effective methodologies derived from diverse scientific explorations, and intended to enhance these explorations as to generate deeper and more holistic knowledge. Innovation may also be achieved through the cultural dimension. Other cultures can offer from their heritage a diversity of resources for exploration; these resources can also contribute to the emergent synthesis of philosophical inquiry.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), PhilPapers, and other databases.

**Journal Rank:** [CiteScore](#) - Q1 (*Philosophy*)
