

Special Issue

Pluralism and Public Health

Message from the Guest Editor

Both original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: public health ethics, applied or political philosophy, bioethics, epistemology, philosophy of science, metaethics, or any other field that can further our understanding of the relationship between pluralism, reasonable disagreement, and public health. Some suggested themes:

- Can population-based interventions (e.g., vaccination programs) respect reasonable disagreement?
- What is the relationship between contemporary public reason—liberalism—and public health ethics?
- What is the proper role of (medical and other relevant) sciences for public health, in light of reasonable disagreement?
- How can metaethics (and other related fields) contribute to our understanding of the relationship between public health and reasonable disagreement?
- Is state “health propaganda” (as broadly construed as possible) justifiable?
- Is it legitimate to ascribe to “health” a special role in public policies?

I/We look forward to receiving your contributions!

About the Journal

Message from the Editor-in-Chief

Philosophies searches for the syntheses of philosophical and scientific inquiries. It promotes philosophical work that is derived from the experience of diverse scientific disciplines and cultures. Multiple philosophies already exist—those of logic, information, computation, natural and artificial life, natural or artificial intelligence, complexity, technology, etc. Our mission is not to abandon philosophical roots and traditions of inquiry, but to promote the development of philosophical foundations and effective methodologies derived from diverse scientific explorations, and intended to enhance these explorations as to generate deeper and more holistic knowledge. Innovation may also be achieved through the cultural dimension. Other cultures can offer from their heritage a diversity of resources for exploration; these resources can also contribute to the emergent synthesis of philosophical inquiry.

Editor-in-Chief
