Moral Perception

Message from the Guest Editor

Recent years have seen renewed philosophical attention and research on the topic of Moral Perception. On one broad understanding, moral perceptions are perceptions of moral properties. Among those who think that there are moral perceptions, substantive disagreement concerns how to characterize their nature more precisely. Related to debates about the nature of moral perception are those concerning its epistemology. Further related questions concern the connection between moral perception and morality more generally. Interest in Moral Perception extends even more. Some might understand moral perception as a kind of sensitivity to features that are morally salient. Another kind of moral perception might be a perception which is itself morally assessable as good, bad, or as criticisable or commendable. This Special Issue on Moral Perception aims to make progress with respect to at least some of these (and related) issues. We therefore invite original research articles on, though not limited to, any of the above questions. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Philosophies searches for the syntheses of philosophical and scientific inquiries. It promotes philosophical work that is derived from the experience of diverse scientific disciplines and cultures. Multiple philosophies already exist—those of logic, information, computation, natural and artificial life, natural or artificial intelligence, complexity, technology, etc. Our mission is not to abandon philosophical roots and traditions of inquiry, but to promote the development of philosophical foundations and effective methodologies derived from diverse scientific explorations, and intended to enhance these explorations as to generate deeper and more holistic knowledge. Innovation may also be achieved through the cultural dimension. Other cultures can offer from their heritage a diversity of resources for exploration; these resources can also contribute to the emergent synthesis of philosophical inquiry.

Editor-in-Chief

Prof. Dr. Marcin J. Schroeder

The Faculty of International Liberal Arts, Akita International University,
Akita 010-1292, Japan

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
