

Special Issue

Contemporary Natural Philosophy and Philosophies - part 1

Message from the Guest Editors

This Special Issue "Contemporary Natural Philosophy and Philosophies" addresses necessity for the revival of Natural Philosophy and aims at contributing in building the ground for this Phoenix's rebirth. It is an extended synthesis, bringing new elements into classical discipline of Newton and Leibniz, building the idea of unity of nature and human as its integral part, on various levels of organization, and from different perspectives of sciences, humanities and liberal arts from their cultural contexts, including technology. More information is given in the Editorial.

About the Journal

Message from the Editor-in-Chief

Philosophies searches for the syntheses of philosophical and scientific inquiries. It promotes philosophical work that is derived from the experience of diverse scientific disciplines and cultures. Multiple philosophies already exist—those of logic, information, computation, natural and artificial life, natural or artificial intelligence, complexity, technology, etc. Our mission is not to abandon philosophical roots and traditions of inquiry, but to promote the development of philosophical foundations and effective methodologies derived from diverse scientific explorations, and intended to enhance these explorations as to generate deeper and more holistic knowledge. Innovation may also be achieved through the cultural dimension. Other cultures can offer from their heritage a diversity of resources for exploration; these resources can also contribute to the emergent synthesis of philosophical inquiry.
