

Special Issue

Religion and Artificial Intelligence: Philosophical Dimensions

Message from the Guest Editors

This Special Issue delves into AI's profound impact on various aspects of life, raising concerns about its implications for humanity. It explores the philosophical intersection of AI and religion, seeking insights into ethics, ontology, and AI's role within religious contexts. Contributions are invited to explore religion's fresh perspectives on AI's ethics, its potential as a religious teacher, and the development of 'religious goods' through machine learning. Original research articles and reviews are welcome, covering areas such as religious ethics, ontological investigations of AI from a religious standpoint, AI within the philosophy of religion, and its contributions to social and religious well-being. The objective is to encourage profound philosophical reflections on the coexistence of AI and religion. We eagerly await your contributions.

About the Journal

Message from the Editor-in-Chief

Philosophies searches for the syntheses of philosophical and scientific inquiries. It promotes philosophical work that is derived from the experience of diverse scientific disciplines and cultures. Multiple philosophies already exist— those of logic, information, computation, natural and artificial life, natural or artificial intelligence, complexity, technology, etc. Our mission is not to abandon philosophical roots and traditions of inquiry, but to promote the development of philosophical foundations and effective methodologies derived from diverse scientific explorations, and intended to enhance these explorations as to generate deeper and more holistic knowledge. Innovation may also be achieved through the cultural dimension. Other cultures can offer from their heritage a diversity of resources for exploration; these resources can also contribute to the emergent synthesis of philosophical inquiry.

Editor-in-Chief

Prof. Dr. Marcin J. Schroeder

The Faculty of International Liberal Arts, Akita International University,
Akita 010-1292, Japan

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), PhilPapers, and other databases.

Journal Rank:
