

## Special Issue

# Is Environmental Virtue Ethics a "Virtuous" Anthropocentrism?

### Message from the Guest Editors

We are pleased to invite you to contribute to this conversation addressing the relationship between EVE and anthropocentrism. In this Special Issue of *Philosophies*, the emphasis should be placed on the possibility of overcoming moral anthropocentrism: converting vicious anthropocentrism into virtuous anthropocentrism or considering a non-anthropocentric virtue ethics. Contributions to this Special Issue are invited to disentangle a number of paradoxes, ambiguities, and contradictions related to the following topics of interest:

- The origins, histories, and definitions of anthropocentrism (e.g., heliocentrism, mecanocentrism, capitalocentrism, occidentalocentrism);
- The conceptual and practical differentiation of environment (e.g., wild nature, anthropized nature, agriculture) and corresponding ethical virtues;

## About the Journal

### Message from the Editor-in-Chief

*Philosophies* searches for the syntheses of philosophical and scientific inquiries. It promotes philosophical work that is derived from the experience of diverse scientific disciplines and cultures. Multiple philosophies already exist— those of logic, information, computation, natural and artificial life, natural or artificial intelligence, complexity, technology, etc. Our mission is not to abandon philosophical roots and traditions of inquiry, but to promote the development of philosophical foundations and effective methodologies derived from diverse scientific explorations, and intended to enhance these explorations as to generate deeper and more holistic knowledge. Innovation may also be achieved through the cultural dimension. Other cultures can offer from their heritage a diversity of resources for exploration; these resources can also contribute to the emergent synthesis of philosophical inquiry.
