

## Special Issue

# Emergencies, Disasters and Catastrophes: Perspectives from Ethics and Political Philosophy

### Message from the Guest Editor

This Special Issue in *Philosophies* delves into the multifaceted aspects of mass emergencies, disasters, and catastrophes. It bridges diverse academic disciplines and philosophical domains, examining the moral and political dimensions of these complex phenomena. The contributions explore topics such as existential risks, intergenerational justice, vulnerability, resilience, and resource allocation. They also investigate ethical obligations, responsibility attribution, and the impact of disasters on healthcare and humanitarian workers. This interdisciplinary exploration enhances our comprehension of disasters from philosophical and ethical perspectives. The Special Issue welcomes original research articles and reviews that shed light on these critical issues in the realm of disasters and catastrophe management.

## About the Journal

### Message from the Editor-in-Chief

*Philosophies* searches for the syntheses of philosophical and scientific inquiries. It promotes philosophical work that is derived from the experience of diverse scientific disciplines and cultures. Multiple philosophies already exist— those of logic, information, computation, natural and artificial life, natural or artificial intelligence, complexity, technology, etc. Our mission is not to abandon philosophical roots and traditions of inquiry, but to promote the development of philosophical foundations and effective methodologies derived from diverse scientific explorations, and intended to enhance these explorations as to generate deeper and more holistic knowledge. Innovation may also be achieved through the cultural dimension. Other cultures can offer from their heritage a diversity of resources for exploration; these resources can also contribute to the emergent synthesis of philosophical inquiry.
