

Special Issue

Historic Ontology and Epistemology

Message from the Guest Editor

We are inviting scholars to submit essays for a Special Issue devoted to historical ontology and epistemology or, perhaps more accurately, methodology. Though ontologies designed to do justice to time and history have been belated (the dominant tradition being one in which becoming has been slighted), philosophers and other theorists have dramatically shifted the focus of attention, especially since the 19th century. Even so, much remains to be explored. For the sake of encouraging this exploration, we are focusing on the ontological status of historical processes. While we adopt an inclusive approach, specifically one open to considering submissions in which their authors explore the possibility of our knowledge of historical phenomena and thus transient affairs, our hope is to receive essays concerned with how our knowledge of such phenomena and affairs, in specific domains. Insofar as epistemology is a discipline preoccupied with the question of skepticism, our interest is more methodological than epistemological (though we are, to repeat, open to epistemologically oriented work).

About the Journal

Message from the Editor-in-Chief

Philosophies searches for the syntheses of philosophical and scientific inquiries. It promotes philosophical work that is derived from the experience of diverse scientific disciplines and cultures. Multiple philosophies already exist— those of logic, information, computation, natural and artificial life, natural or artificial intelligence, complexity, technology, etc. Our mission is not to abandon philosophical roots and traditions of inquiry, but to promote the development of philosophical foundations and effective methodologies derived from diverse scientific explorations, and intended to enhance these explorations as to generate deeper and more holistic knowledge. Innovation may also be achieved through the cultural dimension. Other cultures can offer from their heritage a diversity of resources for exploration; these resources can also contribute to the emergent synthesis of philosophical inquiry.
