

Special Issue

Visible Light Active Photocatalysts for Environmental Remediation and Organic Synthesis II

Message from the Guest Editor

In view of the success of the first edition of the Special Issue, I would like to open the possibility to additional researchers to contribute to the second edition of the Special Issue entitled "Visible Light Active Photocatalysts for Environmental Remediation and Organic Synthesis II". As in the first edition, research and review papers related to novel photocatalytic materials and their use in the visible (or solar light) driven photocatalytic removal of pollutants from liquid and gaseous phases are welcome in this Special Issue. Moreover, innovative photocatalyst formulations studied in chemical reactions devoted to the selective synthesis of organic compounds (e.g., phenol from benzene, aniline from nitrobenzene, methanol from methane, organic compounds from CO₂) will be considered.

Guest Editor

Dr. Vincenzo Vaiano

Department of Industrial Engineering, University Salerno, Via Giovanni Paolo 2 132, I-84084 Fisciano, Salerno, Italy

Deadline for manuscript submissions

closed (30 December 2022)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Dirk M. Guldi
Department of Chemistry and Pharmacy, Interdisciplinary Center for
Molecular Materials, Friedrich-Alexander-Universitaet Erlangen-
Nuernberg, 91052 Erlangen, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), EBSCO,
and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 21.4 days after
submission; acceptance to publication is undertaken in 3.5
days (median values for papers published in this journal in
the first half of 2025).
