

Next-Generation Passive Optical Networks: Progress and Challenges

Guest Editors:

Dr. Kamran Ali Memon

Dr. Xing Ouyang

Prof. Dr. Gao Ran

Deadline for manuscript
submissions:

closed (31 July 2023)

Message from the Guest Editors

This Special Issue of the *Photonics* journal covers a large scope of research in NG-PONs, concentrating on optical access networks and the convergence of integrated fiber and wireless access technologies, and solicits contributions in, but not limited to:

- Evolution, design, and performance evaluation of new standards for next-generation PONs;
- Future softwarization and virtualization of optical access networks;
- Dynamic bandwidth allocation (DBA), dynamic and wavelength bandwidth allocation (DWBA) algorithms, and multiple media access control (MAC) mechanisms;
- Optical metro edge and access aggregation convergence;
- Convergence of optical access and mobile broadband systems for new radio access networks;
- Use of AI/ML for improving performance in optical and radio access networks;
- Fiber-wireless integrated radio access network architecture design and system interface;
- PON architectures for low-latency and high-capacity mesh interconnect of edge nodes;
- Free-space optical communication, elastic optical networks, radio over fiber
- Low Latency Optical Network Systems & Techniques for 6G time-sensitive applications

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q2 (Instrumentation)
