Metrology at High-Power Laser Facilities: Primary and Secondary Laser-Driven Sources

Guest Editors:	Message from the Guest Editors
Dr. Daniel Ursescu	Dear Colleagues,
Dr. Zsolt Divéki	The development of chirped pulse amplification for
Dr. Uddhab Chaulagain	extreme light intensities and subsequently enabled the
Dr. Gabriele Maria Grittani	investigation of a plethora of new processes.
Dr. Michael Ehret	The scientific community is now facing a transition phase, from laboratory to facility-grade laser-driven sources. This requires the harmonization of the metrology for laser- driven primary and secondary sources across the facilities
Deadline for manuscript submissions: closed (10 January 2025)	as a central request of the lasers scientific community and of the non-specialist beamtime beneficiaries at these facilities.
	We are inviting the scientific community to contribute research articles and review papers engaging in laser and laser-driven sources metrology. Research areas may include (but are not limited to) metrology subjects related to primary and secondary sources at laser facilities:
	 pulse sampling review of metrology procedures and technologies new instrumentation for metrology indirect characterization of extreme light-driven sources through experiments

We look forward to receiving your contributions.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases. **Journal Rank:** CiteScore - Q2 (Instrumentation)
