Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to provide an overview and highlights of the most recent theoretical and experimental efforts of applying novel waveguide structures and functional materials on silicon chips toward enhancing or extending the functions of silicon photonic devices, whether passive or active, linear or nonlinear, silicon-based or hybrid material-assisted.

We encourage you to contribute review papers, original research short letters, or long articles on such topics as (1) novel silicon-based waveguide structures such as hybrid plasmonic structure, subwavelength gratings, nano pillars/slots, suspended structures, etc.; (2) silicon photonic devices integrated with CMOS-compatible materials such as SiN and oxides and hybridized with materials such as 2D materials, III-V/II-VI semiconductor compounds, chalcogenides, LiNbO_x, VO_x, magneto-optic materials, phase-change materials, etc.; (3) applications of the aforementioned structures and devices, e.g., programmable photonics, mode manipulations, sensors, MIR photonics, integrated nonlinear optics, etc. Submissions on other topics are also welcome if they are relative to the theme of the Special Issue.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q2 (Instrumentation)
