Special Issue

High-Power Fiber Lasers

Message from the Guest Editor

This Special Issue aims to publish high-quality papers that study emerging and practical technologies in high-power fiber lasers. Research areas may include (but are not limited to) the following topics:

- High-power ytterbium-doped fiber lasers;
- High-power continuous wave fiber laser;
- High-peak-power pulsed fiber laser;
- High-power near-single-mode fiber laser;
- High-power fiber laser oscillator;
- High-power fiber laser amplifier;
- High-power oscillator amplifier integrated laser;
- Nonlinear effect in high-power fiber lasers;
- Transverse mode instability in high-power fiber laser;
- Fast simulation and modeling of high-power fiber laser;
- High-power single-frequency fiber amplifier;
- High-power narrow-line-width fiber amplifier;
- High-power fiber laser components;
- Novel transverse and longitudinal parameter controlled fiber;
- High-power crystal fiber;
- Ytterbium-doped short- and long-wavelength fiber laser;
- High-power novel wavelength laser such as green fiber laser;
- High-power-beam combined fiber laser;
- Other high-power fiber lasers and laser components.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu
School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
