Advancements in Digital Holography: Challenges and Opportunities

Message from the Guest Editors

Digital holography (DH) has emerged as a groundbreaking technique in the field of optical imaging, offering unparalleled capabilities in capturing and reconstructing three-dimensional information, which enables the precise recording of light wavefronts.

Recent advancements in DH have opened up new avenues for research and application. These advancements span across various domains including biomedical imaging, material science, optical metrology, and environmental monitoring. This Special Issue aims to showcase the latest research and developments in DH, highlighting both theoretical advancements and practical implementations. We invite contributions that explore novel methodologies, cutting-edge applications, and interdisciplinary approaches that push the boundaries of what DH can achieve. We believe that this Special Issue will provide a comprehensive overview of the current state of DH, inspire future research, and foster collaboration across different scientific disciplines. We look forward to receiving your valuable contributions and to the fruitful discussions that they will engender.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu

School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
