Recent Progress in Biophotonics

Message from the Guest Editors

Biophotonics, a multidisciplinary field at the intersection of biology, optics, and photonics, has witnessed remarkable advancements in recent years. This Special Issue, titled "Recent Progress in Biophotonics", aims to showcase the latest breakthroughs and innovations in various cutting-edge biophotonic imaging techniques and their applications in biomedicine. This collection of research articles brings together the most current developments in optical coherence tomography (OCT), optical coherence microscopy (OCM), photoacoustic tomography (PAT), photoacoustic microscopy (PAM), fluorescence microscopy (FM), as well as the emerging fields of pulmonary applications, cardiology applications, clearings, and organoids. Additionally, the integration of machine learning in biomedicine will be explored to demonstrate its potential in advancing the capabilities of biophotonics. As we delve into this Special Issue, we anticipate that the recent progress of research presented here will inspire further innovations in biophotonics, propelling the field towards unprecedented advancements in biomedical imaging and its impact on biophotonics.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu

School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
