Special Issue

Hollow-Core Optical Fibers: Recent Advances and Applications

Message from the Guest Editors

This Special Issue aims to provide a comprehensive overview of the developments, understanding, and diverse applications of hollow-core fibers, fostering further research and addressing the challenges faced by modern optical fiber systems. We invite authors to submit research articles covering the following topics:

- Fundamentals of HCF optical properties and design;
- Developments in HCF fabrication technology, fluid dynamics modeling of fiber drawing, and long-term reliability;
- Advanced fiber characterization techniques and performance optimization;
- Nonlinear optics in gas- or liquid-filled HCFs, and management of nonlinear effects;
- Low-latency communications, long-haul, and large-capacity optical communication systems enabled by HCFs;
- Sensing, spectroscopy, and imaging with or in HCFs;
- AI/machine learning for microstructure optimization in HCFs and related applications;
- HCFs filled with metals, nanocrystals, or other solids for novel applications;
- High-power laser delivery, and mid-infrared applications using HCFs;
- Biomedical applications of HCFs, such as surgery, diagnostics, and therapy.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu
School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
