Special Issue

New Trends in Laser Physics Technology

Message from the Guest Editor

Laser physics and laser technologies are so intimately linked together that advancements in each of these fields are always reflected in the other. This Special Issue invites manuscripts on the recent advances in laser physics technologies. All conceptual, theoretical, and experimental papers are accepted. Topics include, but are not limited to, the following: - Trends in the physics and technology of new laser development, as well as novel concepts; - New approaches to the generation of various output wavelengths; - The methods of implementation of new laser generation properties and the influence of technological novelties; - Methods of extending the range and speed of output wavelength tuning, including their combination with measuring other radiation parameters; - The technological possibilities of and limitations to achieving relatively high, record-setting, or special radiation parameters; - Physical and technical problems in the transitioning of laboratory solutions; - The effect of progress in allied technologies (nanotechnologies, artificial intelligence and information technologies, etc.) on the development of laser physics technologies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu
School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
