## Recent Advances in Nonlinear Optics

### Message from the Guest Editors

Nonlinear optics is the foundation for optical frequency generation in regimes that cannot be covered by laser gain media. It can also be used to enhance resolution in laser micromachining and imaging. Furthermore, nonlinear optics is the basis for nonlinear spectroscopy, including Raman/Brillouin spectroscopy, 2-dimensional spectroscopy and surface second-harmonic generation spectroscopy. This Special Issue, “Nonlinear Optics”, will welcome basic, methodological and applied cutting-edge research contributions, as well as regular and review papers, dealing with (but not limited to):

- New principles and phenomena in nonlinear light-matter interaction.
- Nonlinear photonics in chip-integrated devices including waveguides and cavities.
- Nonlinear dynamics in optical fibers, coherently pumped fiber cavities and fiber lasers.
- Ultrafast dynamics in mode-locked lasers.
- Applications of nonlinear optics in high-resolution imaging and micromachining.
- Nonlinear frequency comb generation in high-Q microcavities.
- Signal processing using nonlinear optics.
- Nonlinear spectroscopy.
- Quantum photonics based on nonlinear optics.

---

### Guest Editors

Dr. Chengying Bao

Assistant Professor, Department of Precision Instruments, Tsinghua University, Beijing, China

Dr. Xiaosheng Xiao

State Key Laboratory of Information Photonics and Optical Communications, School of Electronic Engineering, Beijing University of Posts and Telecommunications, Beijing 100876, China

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q2 (Instrumentation)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
