Special Issue

Novel Advances in Optical Communications

Message from the Guest Editors

Since the introduction of low-loss optical fiber and continuously working semiconductor lasers in 1970, optical communication has experienced explosive growth in just a few decades. Today, optical fiber communication technology has become the most important part of the world's information and communication network and has wide application prospects in many fields such as ultra-long-distance telecommunications, mobile communication networks, data centers, cloud computing, radio and television, and military. To provide high-speed, low-delay, large-capacity, low-noise, and low-loss transmission services to meet the ever-growing demand for data communication, optical communication technology is also developing toward the direction of large capacity, low complexity, high flexibility, high reliability, and low cost. In recent years, a large number of emerging technologies and schemes have emerged that constantly promote people's understanding of the boundaries of communication technology. The objectives of this Special Issue are to report the advances in optical communications.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu
School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
